**DETAILED ACTION**

***Amendment***

1. Acknowledgement is made of Amendment filed 17 November 2003.

***Drawings***

2. New corrected/formal drawings are required in this application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

***Allowable Subject Matter***

3. Claims 1 and 4-31 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to specifically teach a ticket counter including a transport mechanism for transporting tickets, the ticket has first and second longitudinal edges, wherein the transport mechanism maintains contact with the tickets while exposing the first and second longitudinal edges of the tickets; a sensor adjacent the transport mechanism and positioned to read first and second longitudinal edges while the ticket is being transported by the transport mechanism; and a receipt generator for printing the quantity of tickets transported by the transport mechanism past the sensor.

Horniak teaches an automated ticket counting apparatus having a transport mechanism for transporting tickets from an inlet, past a sensor, the transport mechanism maintaining contact with the tickets while the ticket is being transported; a sensor adjacent the transport mechanism

Art Unit: 2876

to read the openings/notches/gaps of the ticket while the ticket is transported by the transport mechanism, the sensor determining a quantity of tickets transported by the transport mechanism past the sensor and generating a signal corresponding to the quantity; a computer in communication with the sensors for receiving the signal from the sensor.

Nickels, Jr. teaches multiple input compact ticket processor/computer, which has a printer that which is connected thereto and the printing means to print a receipt and a transactional data on the ticket.

Saunders teaches the computer records information encoded on the tickets including the distributor of the tickets.

However, Horniak, Nickels, Jr., and Saunders, taken alone or in combination thereof, fails to specifically teach a ticket counter including a transport mechanism for transporting tickets; the ticket has first and second longitudinal edges, wherein the transport mechanism maintains contact with the tickets while exposing the first and second longitudinal edges of the tickets; a sensor adjacent the transport mechanism and positioned to read first and second longitudinal edges while the ticket is being transported by the transport mechanism; and a receipt generator for printing the quantity of tickets transported by the transport mechanism past the sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wingeron, Jr. (US 5,996,457) teaches apparatus for destruction of tickets and the like. Nichols et al. (US 5,943,241) teaches item dispensing system. Aubrey (US 4,798,942) teaches easy access ticket transport mechanism. Bittner et al. (US 5,290,033) teaches gaming machine and coupons.
